

## DPA-6 Air Hydraulic Pumps

- Internal relief valve protects circuit components, air inlet filter protects motor .
- High pressure output, light weight by aluminum alloy reservoir.
- Serviceable pump motor is not a "throw away", providing economical repair.
- Permanently vented reservoir cap.
- Three-position treadle provides cylinder advance, hold and retract operation.
- Equipped with air coupler, easy for using.
- dBA 85 at 700bar for all DPA-6 pumps, lower noise.

DPA-6
